

Math End-of-Year Resources to Address Major Clusters– 6th Grade

If you have completed all the chapters in the Go Math textbook, here are two options for the remaining weeks of the school year. Use option 1 when you would like to review standards students struggled with over the course of the year. **Choose** your critical area of greatest need and use the given resources for the appropriate area. A critical area project is provided for assessment purposes as well. Use option 2 if your students are proficient in this year's standards and are ready to prepare for next year.
